

BENEFITS OF A CI/CD PIPELINE

Juan Pablo Restrepo

WHAT IS CI/CD?

BENEFITS OF CI/CD: A PATH TO MORE REVENUE AND LESS COSTS

- Less time on bugs of new features
- Less bugs in production for our customers
- Less infrastructure costs
- More reliability
- Lower downtimes

BENEFITS OF CI/CD: A PATH TO MORE REVENUE AND LESS COSTS

- Less time to market is the most important Benefit of a CI/CD Pipeline.

Time to market, which is the time required to deliver a feature to customers, would decrease significantly thanks to implement CI/CD. This occurs because CI/CD is a methodology and a set of tools that enhance the performance of the development and infrastructure teams. Less time to market can be an accelerator of new revenue.
